

photobook — Document class for building photo-books *

Alex A. Naanou[†]

Released 2024-07-19

Abstract

The `photobook` L^AT_EX document class extends the `book` class defining a set of parameters, meta-macros, macros and environments with reasonable defaults to help typeset, build and print books mainly based on visual/image content.

Contents

Introduction	2	Page cells	14
Usage	2	Foldout page cells	16
Options	2	Multi-page cells	18
Page geometry	2	Endpaper cells	19
layout	3	Cover and dust jacket cells	19
Image clearance	4	Caption Templates	19
Image block layout	5	Page Templates	20
PDF Viewer layout	5	Basic book information	20
Other options	5	Tweaking	20
Packages	5	General interface	21
Globals	5	No bleed	22
Initialization	7	Partial bleed	23
Generic commands	7	Full bleed	24
Environments and Cells	7	Spread Templates	25
Generic	7	No bleed	25
Cells	8	Partial bleed	26
Save cells	9	Full bleed	27
Cell macros	9	Meta Macros / Environments	27
Paper cells	14	Miscellaneous	28
		Issues	29
