1 What is Pennstander ?

Pennstander is a set of OpenType text and math fonts developed by Julius Ross, see github.com/juliusross1 for more information.

Original font is from Tyler Finck, see this website for more information:

<https://etceteratype.co/pages/grandstander>.

This package is based on v0.4.1 version of fonts.

The text and the math fonts are licensed under the SIL Open Font License, Version 1.1.

They require LuaTeX or XeTeX as engine and the unicode-math package¹, if math fonts are required or just the fontspec package² otherwise.

A *variable*³ version of the font, with optical sizing, is available.

¹Please read the documentation `unicode-math.pdf`.

²Please read the documentation `fontspec.pdf`.

³Please read the article <https://github.com/juliusross1/Pennstander/tree/main/docs>.
