

sourcesans

Adobe's Source Sans typeface for $\text{\LaTeX}$

Silke Hofstra, tex@slxh.nl

Documentation for sourcesans v3.1.
May 3, 2026

This package provides the Source Sans font in an easy to use way. For $\text{\X}\text{\LaTeX}$ and $\text{\Lua}\text{\LaTeX}$ users the original OpenType fonts from [GitHub](#) are used. The entire font family is included.

This package is also available on [GitLab](#).

1 Options

The package has the following options:

- **oldstyle, osf**: use old style numbers.
- **lining, nf, lf**: use lining numbers.
- **tabular**: use fixed-width numbers.
- **proportional**: use normal numbers.
- **black**: $\text{\bfseries}$ is black.
- **semibold**: $\text{\bfseries}$ is semibold.
- **bold**: $\text{\bfseries}$ is bold.
- **light**: $\text{\mdseries}$ is light.
- **extralight**: $\text{\mdseries}$ is extra light.
- **regular**: $\text{\mdseries}$ is regular.
- **medium**: $\text{\mdseries}$ is medium.
- **scale, scaled**: Change the scaling with a factor. For example: `scale=.5`
- **default**: Source Sans is set as the default font family and as the sans serif family.
- **nosfdefault**: Source Sans is not set as sans-serif family.
- **type1, t1**: Override automatic detection and use the Type 1 fonts.
- **opentype, otf**: Override automatic detection and use OpenType fonts.

The following options are enabled by default: lining, tabular, bold and regular.

2 Commands

Commands for all weights are also provided for $\text{\X}\text{\LaTeX}$ and $\text{\Lua}\text{\LaTeX}$ users.

- **$\text{\sourcesans}$** – the regular and bold weights.
- **$\text{\sourcesansmedium}$** – the medium and bold weights.
- **$\text{\sourcesanslight}$** – the light and semi-bold weights.
- **$\text{\sourcesansextreme}$** – the extra light and black weights.

3 Licence

Adobe's Source Sans typeface is available under the [SIL Open Font License 1.1](#).

All $\text{\LaTeX}$ code is available under the [\$\text{\LaTeX}\$ project public license](#) v1.3 or later.

4 Specimen

Simple specimen can be found on page 4. Full specimen can be [acquired from Adobe](#).

5 OpenType

The OpenType fonts have many features, including old style numerals (1 6 9), ligatures (ff fi fl ft fl) and stylistic alternatives (l a g I).
