

```

\begin{sleevesheet}\langle your text \rangle \end{sleevesheet}
\begin{singlesheet}{\langle title \rangle}{\langle slip text \rangle} \langle your text \rangle \end{singlesheet}

```

Here $\{\langle title \rangle\}$ is the title on the back of the covers, $\{\langle slip text \rangle\}$ is the text that should go on the back slip of the single type cover.

In figure 1 to 4 there are some examples of these environments.

Figure 1: Example of `bookletsheets` output

Figure 2: Example of `backsheet` output
