

TypoG

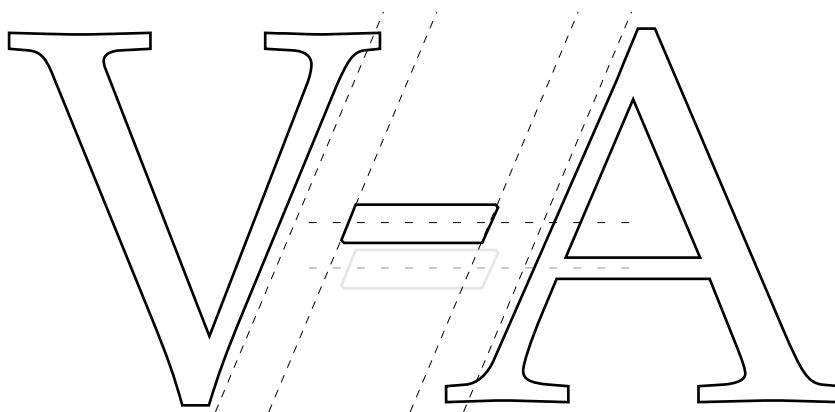

A L^AT_EX Package for Micro-Typographic Enhancements

Ch. L. Spiel*

v0.5 2025/10/27

Abstract

The `typog` package provides macros and environments to improve micro-typographic quality. It enables fine-tuning of hyphenation, spacing, font adjustments, and alignment. Features include control over T_EX's paragraph justification, customizable spacing, font characteristic adjustments, and specialized environments for precise paragraph layout and alignment.

This package is copyright © 2024, 2025 Ch. L. Spiel. It may be distributed and/or modified under the conditions of the [L^AT_EX Project Public License](#) (LPPL), either version 1.3c of this license or – at your option – any later version. This work has the LPPL maintenance status “author-maintained”.
