

The `bbold` symbol font

Introduction

This document describes the `bbold` math alphabet. This is an open (or ‘blackboard bold’) geometric sans serif, intended mainly for use in mathematics, but which may prove useful for decorative work.

To use the fonts in $\text{\LaTeX}2_\epsilon$, you select the `bbold` package, and then use the `\mathbb` command to get blackboard bold mathematics, `\textbb` for text, or `\bbfamily` for longer text. The full font is:
