

2 Using the fonts

To access the fonts, you simply load the relevant package in your preamble. For example:

```
\usepackage{Zallman}
```

Each package provides two new commands. The first is a font *switch*. It switches to the relevant set of initials until the end of the group, or until another command switches to a different family. You will rarely wish to use these commands directly but they are useful in the definitions of macros. For example, these are the commands you will need if using the fonts with the *lettrine* package. (See section 3 for examples.)

The second takes a single, mandatory argument and typesets that argument in the appropriate font.

Family	Package	Switch	Command	ABC	abc
Acorn	Acorn	\Acornfamily	\acorn{}		
AnnSton	AnnSton	\AnnStonfamily	\astone{}		
ArtNouv	ArtNouv	\ArtNouvfamily	\artnouv{}		—
ArtNouvC	ArtNouvC	\ArtNouvfamily	\artnouvc{}		
CarrickC	CarrickC	\Carrickcfamily	\carr{}		
Eichenla	Eichenla	\Eichenlafamily	\eichen{}		
Eileen	Eileen	\Eileenfamily	\eileen{}		
EileenBl	EileenBl	\EileenBlfamily	\eileenbl{}		
Elzevier	Elzevier	\Elzevier	\elz{}		
GotIn	GotIn	\GotInfamily	\gotin{}		—
GoudyIn	GoudyIn	\GoudyInfamily	\goudyin{}		—
Kinigcap	Kinigcap	\Kinigcapfamily	\kinig{}		
Konanur	Konanur	\Konanurfamily	\konanur{}		
Kramer	Kramer	\Kramerfamily	\kramer{}		
MorrisIn	MorrisIn	\MorrisInfamily	\morrisin{}		
Nouveaud	Nouveaud	\Nouveaudfamily	\nouvd{}		
Romantik	Romantik	\Romantik	\romantik{}		
Rothdn	Rothdn	\Rothdnfamily	\roth{}		
Royal	Royal	\Royal	\royal{}		—
Sanremo	Sanremo	\Sanremofamily	\sanremo{}		
Starburst	Starburst	\Starburstfamily	\starburst{}		
Typocaps	Typocaps	\Typocapsfamily	\typocap{}		
Zallman	Zallman	\Zallmanfamily	\zall{}
